

List of tables

Volume 1

Resuscitation

- Paediatric therapy in cardiac arrest 6
- RAPS and REMs 11
- REMS score and in hospital mortality 11
- Oxygen cylinder capacity 17
- Induction agents 22
- MAC values 23
- Nitrous oxide cylinder capacity 23
- Entonox (Aus) cylinder capacity 24
- Entonox (NZ) cylinder capacity 24
- LMA sizes 34
- iGel sizing chart 35
- ETT sizes 39
- Laryngoscope sizes 39
- Drug doses in obesity 42
- Indications for mechanical ventilatory support 51
- Risk of stroke / year according to CHADS2 score 65
- AF spontaneous reversion rate 66
- Post-reversion time of return of atrial contraction 67
- Monophasic energy settings and AF defibrillation 67
- Biphasic energy settings and AF defibrillation 67
- Features of accessory pathways 73
- Atrial flutter and ventricular rate 77
- Annual incidence of syncope and age 93
- Differentiating features of syncope and generalised seizure 95
- Properties of intravenous catheters 98
- CVC insertion length and site 105
- Shock therapy checklist 114
- Methods of assessment of hypovolaemia 115
- Correlation of IVC diameter with CVP 115
- Simplified relationship of IVC diameter and CVP 116
- Assessment of hypovolaemia 116
- Emergency transfusion score 117
- Predictors of massive transfusion in trauma (ABC score) 117
- Heart rate and intervention rate in trauma 117
- Blood group frequency in Australia 120
- Blood group and compatibility 120
- Type of unit and compatibility 120
- Risk of viral infection following transfusion 121
- PEEP adjustment according to FiO2 125
- MEDs Score parameters 126
- MEDS and mortality 126
- Actions of sympathomimetic / inotropic agents 128
- Blood pressure values 131
- Laryngoscope blade sizes 142
- ETT sizes 142
- Maintenance fluid requirements 143
- CVC catheter sizes 144
- Intercostal catheter sizes 144
- Apgar score 145
- Endotracheal tube sizes for neonatal resuscitation 145
- Initial IV opiate dose for patients > 12 and < 70 years of age 150
- Intranasal fentanyl doses 150

Clinical practice skills

- MBTI types and general descriptors 180
- Decision making and personality 180
- Differences between bosses and leaders 181
 - Team member roles 186
- Study techniques 195
- Distribution of the indigenous population 202
- Did not wait rates (Australia 08-09) 211
- Normal values for PLAX view 236
- Relative usefulness of echocardiographic views 237
- Hounsfield units 242
- Radiation doses and risks from common imaging series 243
- Radiation bands 243
- Commonly used ultrasound frequencies 244
- Risk of contrast reaction 249
- Number of tests and false positive results 252
- Haemolysis rate and needle size 252
- Clinical significance of likelihood ratios 254
- Change in probability for a test with 90% sensitivity and specificity 254
- Normal [H+] by pH 256
- Inspiratory pO2 and altitude 256
- Typical daily water balance for a 70 kg person 264
- Risk of VF and serum K+ concentration 271
- Potassium concentration and toxic effects 272
- Treatment of hyperkalaemia 273
- Creatinine reference range and age 274
- Calcium reference range and age 275
- Magnesium concentration and toxicity 280
- Phosphate reference range and age 280
- Bilirubin reference range 282
- Normal ALP values and age 283
- Liver function test abnormalities in hepatocellular and obstructive liver disease 284
- Normal adult red blood cell values 287
- Normal adult values 287
- Normal paediatric values 288
- Normal ESR values 290

Research skills

- Example of a PICO literature search 307
 - CONSORT abstract guidelines 309
 - Patient flow through a study 310
 - Study type, design and reporting standard 317
-

Odds ratio table 329	Degrees of correlation 335
Absolute, relative risk and NNT 330	Correlations according to data type 335
Phi coefficient 332	Kappa scores and level of agreement 336
Management	
Waiting times in Australian EDs (2008-9) 343	Cost per patient by triage category (2006 estimate) 364
Triage and in hospital mortality 344	Health outcomes by country 366
Acute inpatient beds by country 354	ACEM recommended minimum FACEM staffing levels 371
Potential effects of ED time limited targets 358	Triage sort 381
Total cost contributions 363	
Procedural costs (2006 estimate) 364	
Cardiovascular disorders	
Symptoms in PE 388	Risk of ICH following thrombolysis 431
Examination findings in PE 388	TNK dose schedule 433
Simplified Well's score 389	Time to reperfusion and NNT 435
Revised Geneva score 389	Time to reperfusion and mortality 435
Ultrasound and echocardiography for diagnosis of PE 394	Killip classification of left ventricular failure 436
Differentiating pericarditis from STEMI 404	Forrester Diamond Swan classification 436
Coronary artery disease risk factors 407	Test performance of abdomino-jugular reflex for JVP 442
Clinical predictors of ACS 407	Classification of ejection fraction 443
Negative likelihood ratios for ACS 407	Positive LRs for CCF 443
ECG test performance for diagnosis of AMI 408	Negative LRs for CCF 443
Sgarbossa's criteria and probability of MI 412	Auscultatory accuracy for heart murmurs 448
Likelihood ratios of AMI in LBB by onset 413	Accuracy of cardiac dynamic manoeuvres 450
TIMI score and 14 day adverse cardiac event rate 424	Severity grading of aortic stenosis 450
Prevalence of ACS in ED patients 424	Echocardiographic features of aortic regurgitation 452
Risk stratification of ED patients with chest pain 424	Mitral valve area and severity of mitral stenosis 452
Very low risk stratification of chest pain 424	Classification of severity of mitral regurgitation 453
ACS treatment summary 428	Severity of tricuspid regurgitation 454
Number needed to treat with reperfusion in STEMI 429	Differentiation of systolic murmurs 458
Resolution of ST elevation in STEMI and outcome 430	Differentiation of diastolic murmurs 458
Risk factors for stroke following thrombolysis 431	Ankle brachial pressure index 479
Respiratory disorders	
Normal PEFR according to height 498	Likelihood ratios for CAP 523
Normal lung volumes for an average sized male 498	SMART COP scoring system 524
Initial assessment of severity of acute asthma in adults 501	PSI scoring system 525
Likelihood ratios for COPD 512	CURB - 65 score and outcome 525
	Features of a pleural exudate 544
Abdominal disorders	
Normal mean liver span values in adults 548	Positive LRs for appendicitis in children 561
Features of hepatic bruits 548	Negative LRs for appendicitis in children 561
Positive LRs for appendicitis in adults 560	Age & height based NGT length calculation 564
Negative LRs for appendicitis in adults 560	Ranson's criteria and mortality 578
MANTRELS/Alvarado scoring system for appendicitis 561	Childs - Pugh classification of severity of liver disease 588
Neurological disorders	
Bulbar and pseudobulbar palsy 618	Cerebral tumour symptoms 667
ECASS results 640	Cerebral tumour symptoms 667
Features of meningitis in adults 654	Normal paediatric coma score and age 682
CSF findings in meningitis 655	
Endocrinology	
Normal fasting blood glucose and age 705	705

Volume 2

Infectious disorders

Time required for thermal disinfection 737

Effectiveness of disinfecting agents 737

Paediatrics

Normal parameters in children 794

Causes of limping in children 796

Features of malignancy in children 796

Normal CSF values in children 811

Features of Kawasaki syndrome 814

Bronchiolitis severity assessment 816

Croup examination 817

Westley croup score 818

Differential diagnosis of stridor (Dis-Ex) 819

Assessment of dehydration 823

Composition of oral rehydration solutions 823

Common causes of abdominal pain in children 825

Causes of crying in infants 829

Mental health

Features of mania and hypomania 845

Relative potency of antipsychotic medications 851

Obstetrics & gynaecology

Assessment of miscarriage 857

Normal BHCG values 876

Serum urate in pregnancy 878

Differential diagnosis of HELLP 887

Differential diagnosis of antepartum haemorrhage 890

Pulmonary investigations 892

CT in pregnancy 892

Plain radiography 892

Contrast studies 892

Nuclear medicine studies 892

Urogenital disorders

Calculus size and spontaneous passage rate 897

Narrowing points of the ureter 897

Complications of dialysis 921

Haematological disorders

Factor VIII doses 948

Factor VIII levels and severity 948

Risk factors for venous thrombosis 952

Risk of DVT in hospitalised patients without VTE prophylaxis 952

Wells score 953

APTT and adjustment of heparin infusion for a 70kg per-

son 958

Target INR range 959

Prothrombinex dose for elevated INR 960

Day 4 Warfarin dose 961

3 Day Warfarin loading regimen 961

Differentiation of polycythaemia 968

Immune function disorders

Therapeutic ranges for ciclosporin 983

Environmental disorders

Indications for pressure immobilisation technique 1003

Types of antivenom 1004

Comparison of Funnel Web and Redback spider envenomation 1011

Snake envenomation effects 1017

Comparison of arterial gas embolism and decompres-

sion sickness 1036

Expected rewarming rates by technique 1042

Comparison of cooling methods 1047

Oxygen partial pressure at altitude 1050

Absolute contraindications to flying 1052

Head & neck disorders

Causative organisms of otitis media 1078

Average age at eruption of permanent teeth 1098

Eye disorders

Prevalence of visual impairment 1114

Out of hospital care

Volume change and altitude 1124

Oxygen cylinder capacity (Australia) 1125

Oxygen cylinder capacity (NZ) 1125

Trauma

Annual trauma death rates in Australia 1127
Revised trauma score 1135

Frequency of pelvic fractures by type 1193
Time of suture removal 1234

Bone and joint disorders

Femoral epiphyses 1272
Clavicular epiphyses 1294
Scapular epiphyses 1296

Humeral epiphyses 1296
Elbow epiphyses 1300
Wrist epiphyses 1304

Toxicology

Frequency of route of exposure to poisoning 1311
Cumulative suicide rate following poisoning 1312
Standard drinks 1330
Effects of ethanol 1331
Effects of alcohols on osmolality 1336
Pharmacokinetic properties of NSAIDs 1348
Pharmacokinetic properties of benzodiazepines 1350
Pharmacodynamic properties of antidepressants 1365
Pharmacokinetic properties of common antidepressants 1365

Properties of beta blockers 1373
Pharmacokinetics of calcium channel antagonists 1374
Probability of toxicity 1375
Digoxin levels and toxicity 1376
Theophylline toxicity 1382
Chemical warfare agents 1393
Half life of COHb 1407
Iron content 1413
Conversion to SI units 1
